GONE TO TEXAS

GONE TO TEXAS

The latest state-to-state migration flows data from the U.S. Census Bureau reveal over half a million people moved to Texas from other states in 2019, among the highest in-migration flows of all U.S. states, second only to Florida. Texas net migration (in-migrants minus out-migrants) during this time was over 106,000, with California contributing over 42% to this net migration. The next two highest sending states to Texas were Florida and Illinois. During this same period, over 37,000 Texans moved to California, but the greatest net migrant loss from Texas went to Colorado.
